

# **BASSnet 2.11 SP1 Hotfix 2-050 Patch Release Notes**

# Product Release Information

**Product:** BASSnet<sup>™</sup> 2.11 SP1

Release Number: BN2.11 SP1 HF2-050

Release Date: 7th Aug 2023

Customer Support: For more information or support, please visit our website <a href="http://www.bassnet.no/">http://www.bassnet.no/</a>

# This release addresses the following issues:

This release note describes the system-bug corrections (as reported by Customers) and new enhancements, if any, made in BASSnet 2.11 SP1 carried out in the Hotfix 2-050 patch released on 7<sup>th</sup> Aug 2023.

Changes/fixes have been implemented in the following modules:

| Maintenance | <u>SAFIR</u>           |
|-------------|------------------------|
| Procurement | <u>Risk Management</u> |

# **Recent Changes**

## 1. Maintenance

- [Defect 78249] Fixed the long load time when selecting a distribution group and assigning a vessel to the group in Manage Distribution Group.
- □ [Defect 78053] Resolved an issue where the counter average value reset to 0 after reporting a counter interval job as done and shifting the job to history.

The **Job Report** data is created by the system automatically when shifting a counter interval job to history and caused the counter average value to reset to 0 if:-

- The **Running Hours** of the scheduled job's component is different from its counter's latest reading.
- The date selected as **Done Date** when reporting the job is after the counter's last read date.
- The Actual Counter Value is the same value as the current counter's reading.

- [Defect 78030] Fixed the Routine Task Template window position being fixed and unable to move from the center of the screen, which prevented it from being dragged and repositioned like other BASSnet windows.
- [Defect 77760] Resolved an issue where the 'linked document' (paperclip) icon went missing for some Scheduled Jobs on the Find grid after performing Batch Update on the Standard Instructions screen.

This issue occurred because the linkage of document records and scheduled job records in the database were incorrect.

#### 2. Procurement

- [Defect 78380] Resolved the deadlock issue when users edited and saved Purchase Order (PO) records. Also improved system performance when raising POs and canceling indirect POs while choosing to retain the quotation.
- [Defect 78259] Resolved an issue where users were not able to connect a Project PO to the new project's section/job after changing the Project Code. The system will now remove the SPECCOST\_ITEM\_ID, JOB\_ITEM\_ID, and SPECCOST\_TYPE\_ID in the PO database when users change the Project Code to allow connecting to the new project's Section/Job.

□ [Defect 78293] Fixed an error that appeared when creating a quotation from a partial contract requisition that contains any non-contract item with 0 quantity.

- [Defect 77564] Resolved an issue on the Budget Query screen Transaction Details tab where transaction details were not displayed for invoices connected to a purchase order with 0 supplier currency rate (i.e. exchange rate between supplier currency and base currency missing).
- [Defect 77913] Fixed an error that appeared when opening the eCommerce Adapter Query. This issue occurred due to duplicate records with the same Message Reference Number in the database.

[Defect 78214] Resolved an issue with Audit/Inspection reports where Observation entries created (under the Observations tab) went missing after saving and re-opening the record. This issue only occurred when the Checklist field under the Audit/Inspection tab was left empty.

### 4. Risk Management

- [Defect 78123] Resolved an issue where users were unable to edit the Permit to Work Details on the Risk Assessment Form screen – Permit to Work tab if the permit to work was inherited from the Master Template.
- □ [Defect 78124] Resolved an issue where the system was unable to save any changes to the **Permit to Work Details** on the **Risk Assessment Form** screen **Permit to Work** tab.
- □ [Defect 78125] Resolved an issue where the **Save** button was disabled on the **Risk Assessment Form** screen after the user edited details of a permit to work.
