This release addresses the following issues:

This release note describes the system-bug corrections (as reported by Customers) and new enhancements, if any, made in BASSnet 2.11 carried out in the Hotfix 5-026 patch released on 23rd August 2023.

Changes/fixes have been implemented in the following modules:
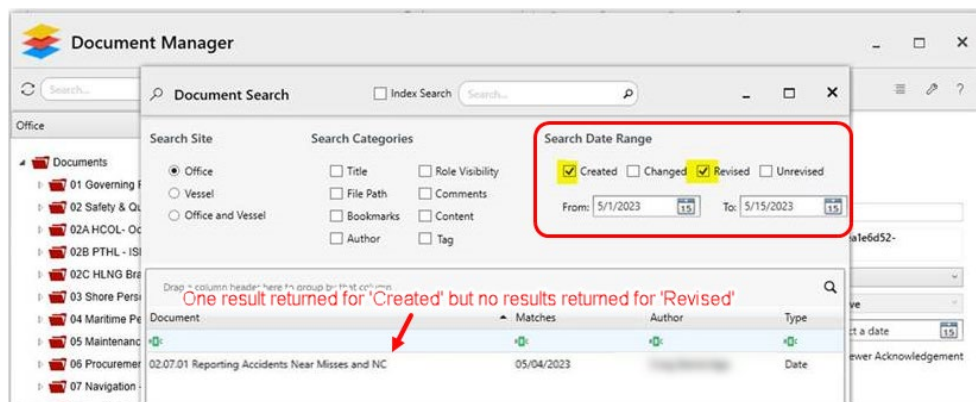

[Document Manager](#)   [Risk Management](#)
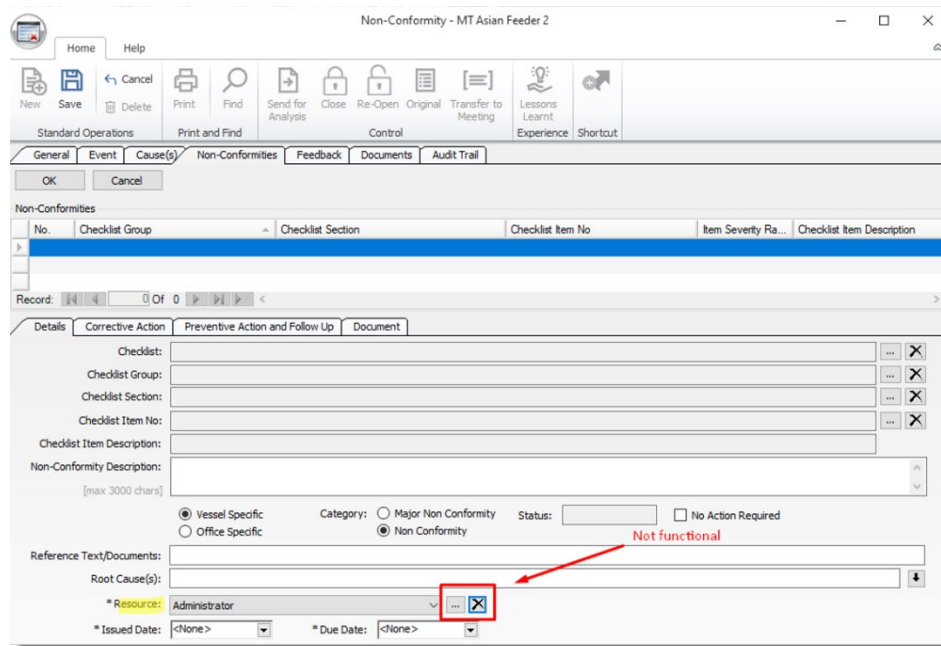

[SAFIR](#)

Recent Changes

1. **Document Manager**

   ❑ [Defect 78233] Resolved an issue on the **Document Search** screen where selecting more than one filter criteria using the **Search Date Range** method, for example, **Created** and **Revised**, and then entering the **From** and **To** dates returned results for only one instead of the two selected criteria because the system incorrectly applied the 'OR' condition instead of 'AND' when performing the search.

❑ [Defect 78393] Resolved an issue where Supporting Documents failed to be removed from the **Documents Under Review** screen when the **Cancel Review** button was clicked.

❑ [Defect 76393] Resolved an issue where a user that did not have the **Delete** privilege for documents was still able to permanently delete a document by pressing the **Delete** key, although the **Remove** button was disabled (due to the user not having privilege to delete documents).

2. SAFIR

❑ [Defect 78541] Resolved an issue on the **Non-Conformity** screen – **Non-Conformities** tab – **Details** sub tab where the **Resource** Lookup and Cancel buttons were not functional.

3. Risk Management

❑ [Defect 78362] Resolved an issue where adding a new attachment using **Attach and Send** under the **Documents** tab incorrectly overwrote the **Last Revisor** and **Revised Date** information for all the previous attachments.

❑ [Defect 78410] Resolved an issue where Risk Assessment Forms created in vessels were incorrectly appearing as "Office" in the **Created At** column on the **Risk Assessment Overview** screen.
