This release addresses the following issues:

This release note describes the system corrections (as reported by Customers) and new enhancements, if any, made in BASSnet 2.11 carried out in the Hotfix 5-028 patch released on 18th October 2023.

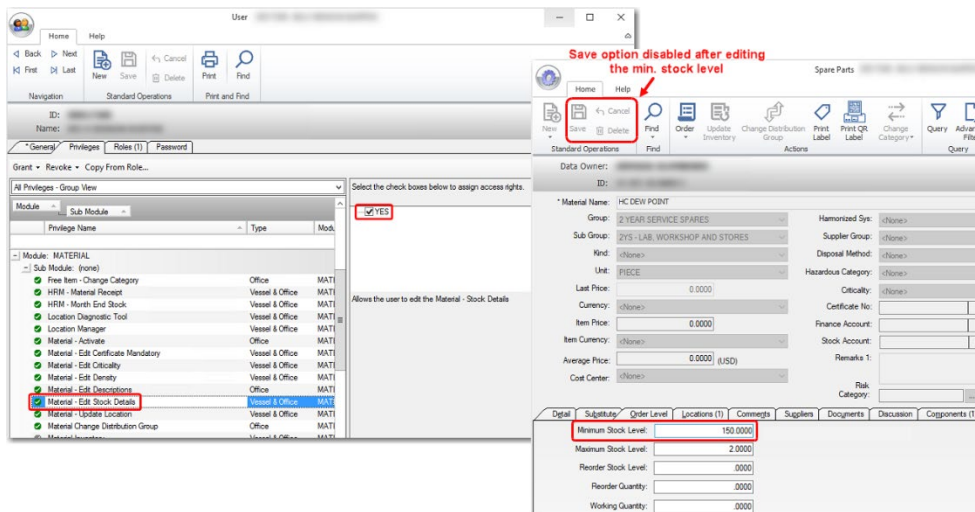

Changes/fixes have been implemented in the following modules:

[Material](#)

Recent Changes

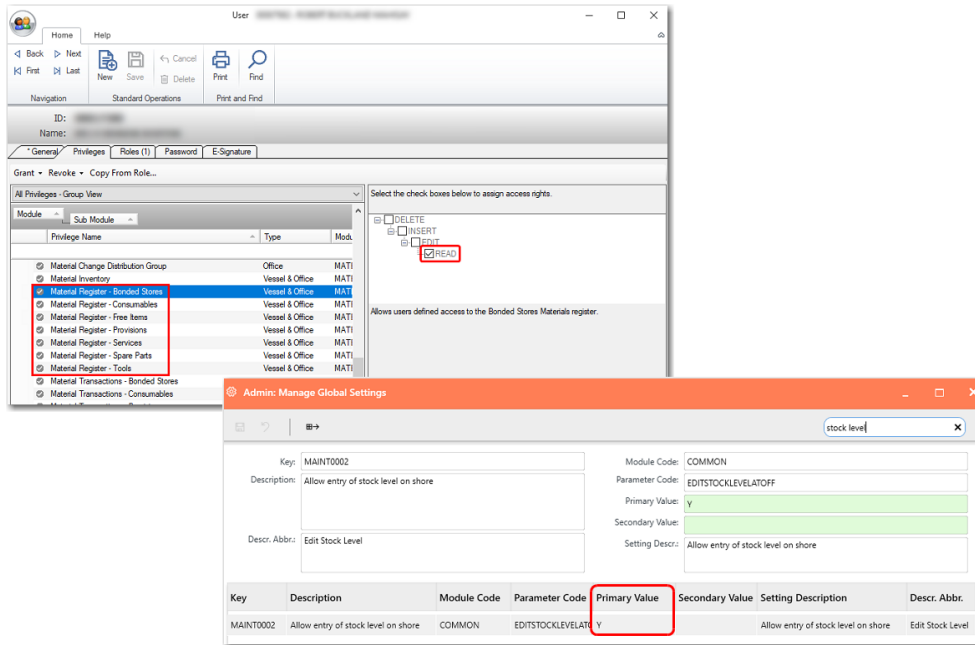

1. Material

- [78965] Resolved an issue where users granted the **Material – Edit Stock Details** access right were unable to save the changes after editing the stock details under the **Order Level** tab of the material screens (**Spare Parts, Consumables, Tools, etc.**)

The screenshot displays the BASSnet user interface. On the left, a 'Privileges' window is open, showing a list of modules and their access rights. The 'Material - Edit Stock Details' privilege is checked, and a red box highlights the 'YES' checkbox. The main window shows the 'Material - Edit Stock Details' form for material 'HC DEW POINT'. The 'Save' button in the top toolbar is disabled (greyed out), and a red arrow points to it with the text 'Save option disabled after editing the min. stock level'. The 'Minimum Stock Level' field is highlighted with a red box and contains the value '150.0000'.

This issue occurred even when the **Primary Value** for the 'Allow entry of stock level on shore' key in **Global Settings** is set to 'Y' (Yes) and users were granted the read-only access right for the **Material Registers**.
