Recent Changes

1. Materials

- ❑ [79621] Resolved an issue in the **Material Inventory** report where the system failed to apply the specific **Location Tree** selected by users in the report filter, resulting in the generated report incorrectly displaying data for different storage Locations that share the same Store Location name.

The screenshot shows the Material Inventory Report interface. On the left, there is a filter section with a 'Location Tree' dropdown menu set to 'UNRO-Aso del Rey (ACC. DECK 06 BLUE DECK/LOC 1)'. Below this, there is a table of inventory items. The table has columns for ID, Description, Maker, Maker's No., Type, Material Group, Subgroup, Critical, Unit, and Total Stock. Several rows are highlighted in green, and two rows are highlighted in red with the text 'INCORRECT DATA INCLUDED' overlaid on them. The red rows correspond to items with IDs BIPN-380175 and BIPN-378134.

2. Procurement

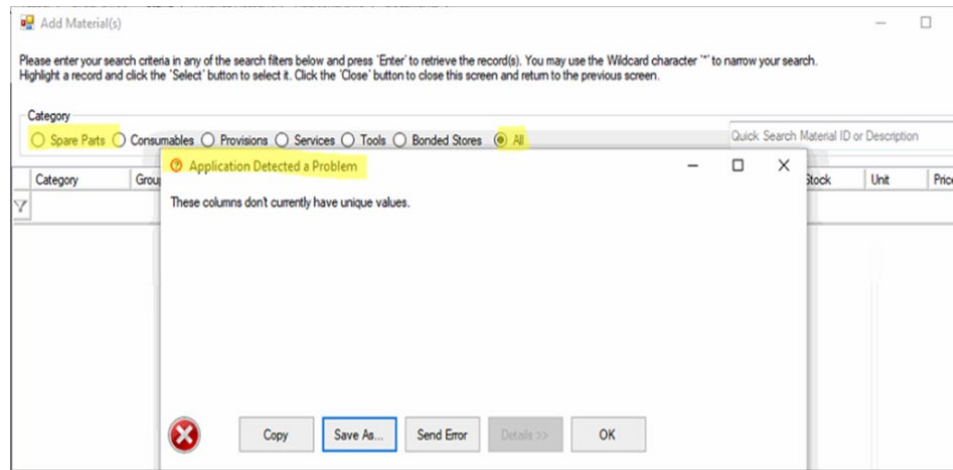

- ❑ [80258] Resolved an issue where previously, after the user cancelled a Final Invoice that was connected to a Purchase Order, the user was not able to set another invoice as 'Final Invoice' when connected to the same Purchase Order.

- ❑ [79289] Resolved an issue where users were able to delete a partially approved supplier quotation by first deleting all the items in the requisition and then adding them back.
- ❑ [79265] Fixed an error that appeared when opening the **Compare Quotes** screen from the **Requisition** screen if the **Other Costs** and **Freight Charges** check boxes were selected for multiple suppliers.

- ❑ [79229] Fixed an error that appeared on the **Add Material(s)** screen when the **All Materials** check box and the **All** radio button were selected for Purchase Orders or Requisitions that are linked to a component.

3. SAFIR

- ❑ [79380] Resolved an issue where the **Action Overdue** alert did not filter the Completed Date for Observations. This caused reports with closed observations to incorrectly appear in the alert.
