2. Procurement

- [80647] Resolved an issue where the **Requisition** screen was unable to close after opening the **Find** screen without first opening a record.
- □ [80651] Fixed an error that appeared when saving or creating a new Purchase Order, transferring invoice to account, recalling invoice and performing change account routine.

This only occurred when the regional short date format was set to dd-MMM-yy.

ailed to u	cation Detected a		Must be between	n 1/1/1753 12:00:0	0 AM and	~

-		Save As	Send Error	Details >>	OK	

- □ [80652] Improved overall system performance when performing the following processes:
 - When handling requisition, quotation and raising PO for records that contain contract items.
 - When opening Material lookup from the Requisition and Purchase Order screens.
 - When printing reports in Requisitions and Quotations.
 - When using Create As to create Requisitions and Purchase Orders.
 - When saving Purchase Orders.
 - When sending emails in Purchase Orders.
 - When creating, updating and deleting shipment.
 - When creating, updating, deleting, transferring to account and recalling invoices.
 - Improved memory efficiency when importing SupplierLink Excel files.
 - Removed the pre-load item when opening material lookup when the ONEMATCATITEM config is enabled
 - When the Contract Flag from quotation is compared with the contract information that are retrieved based on the requisition item information.
- [80653] Resolved an issue where users were able to delete a partially approved supplier quotation by first deleting all the items in the requisition and then adding them back.
- [80654] Fixed an error that appeared when creating a Supplier Quotation with contract items and non-contract items for which the Qty. Approved is 0 in the requisition.

[80658] Resolved an issue where the system incorrectly prompted the user to retain materials after cancelling a Purchase Order, even though there were no valid items to be retained in the Quotation (as the item was still tied to another PO).

This caused the requisition status to revert from 'Ordered' to 'Partially Ordered', but the items did not appear when splitting the requisition.

[80659] Resolved an issue with the Purchase Planner widget where inactive materials were displayed in the Stock < Min Stock, Stock < Reorder Stock Level and Insufficient Qty for Jobs material lists, and users were able to order the inactive materials.</p>

[80112] Fixed an error that appeared on the **Requisition** screen when opening the Account lookup screen in a bulk requisition record that was created using an Excel Template with only free items.

3. SAFIR

[80110] Resolved an issue on the Training & Drills Planner screen where the timeline displayed in the planner was not following the Planner Period date range selected on the Filter screen.

5. Operations

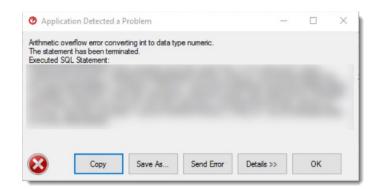

□ [80035] Resolved an issue where the system automatically inserted the value of 0 in the 'Hours of rests in any 7-day' column due to the crew not having any previous work days.

The column should not have 0 values since it is any 7 days, so even though there are no previous work days, the system must treat the 7 days as full rest hours.

6. Projects

□ [80603] Fixed an error that appeared when changing the PO Amount of a **Purchase Order** that is connected to a Project on the **Purchase Order** screen.

□ [80401] Resolved an issue where list numbering in Project **Job Descriptions** did not appear in sequence in the **Project Specification Report**.
