

BASSnet 2.11 SP1 Hotfix 2-080 Patch Release Notes

Product Release Information

Product:	BASSnet™ 2.11 SP1
Release Number:	BN2.11 SP1 HF2-080

Release Date: 29 February 2024

Customer Support: For more information or support, please visit our website <u>http://www.bassnet.no/</u>

This release addresses the following issues:

This release note describes the system corrections (as reported by Customers) and new enhancements, if any, made in BASSnet 2.11 SP1 carried out in the Hotfix 2-080 patch released on 29th February 2024.

Changes/fixes have been implemented in the following modules:

Maintenance	Materials
<u>Procurement</u>	Operations
<u>Projects</u>	

Recent Changes

- 1. Maintenance
 - [80536] Resolved missing dates in the Done Date column under the Other History tab of the Job History screen.

[80201] Fixed the following error that occurred when users reported a Job as Done and moved it to History.

This error occurred in both the Office and Vessel sites due to the Counter's average value being too low while the Job Order's interval length is set too high. As a result, the re-calculated Next Due Date for the Scheduled Job exceeded the maximum year of 9999.

3. Procurement

- [80639] Fixed an error that appeared when transferring to account invoices that were linked to Purchase Order records that:
 - Were created in older BASSnet versions, and
 - Have 4 or more line items.

O Application Detecte	d a Problem		-	×
Failed to update record(s).	Must declare the scale	r variable "@TrxA	mountBase".	

[80640] Resolved an issue where previously, after the user cancelled a Final Invoice that was connected to a Purchase Order, the user was not able to set another invoice as 'Final Invoice' when connected to the same Purchase Order.

- [80612] Resolved an issue where column filters inserted in one record were incorrectly carried over to other records when opening from the same window. Column filters were only reset after closing the window and re-opening it again.
- □ [79967] Resolved an issue where the materials' Component ID was missing when Material Transaction is performed using BASSnet Procurement (i.e. updating PO to Fully Received).
- [80332] Resolved an issue where the system incorrectly prompted the user to retain materials after cancelling a Purchase Order, even though there were no valid items to be retained in the Quotation (as the item was still tied to another PO).

This caused the requisition status to revert from 'Ordered' to 'Partially Ordered', but the items did not appear when splitting the requisition.

- □ [79973] Resolved an issue where the **Requisition** screen was unable to close after opening the **Find** screen without first opening a record.
- □ [80070] Fixed an error that appeared when clicking **Sent to Vessel** on the **Shipment** screen **Items** tab.

[80451] Resolved an issue with the Purchase Planner widget where inactive materials were displayed in the Stock < Min Stock, Stock < Reorder Stock Level and Insufficient Qty for Jobs material lists, and users were able to order the inactive materials.

4. Operations

□ [80489] Resolved an illogical setting in **Vessel Particulars** where users were prevented from deleting an incorrectly added Main Engine or Aux. Engine if the engine was set as the Default Engine and after clearing the **Default Engine** check box, the system then prevented users from saving the Vessel Particulars because no Default Engine was detected.

5. Projects

[80602] Fixed an error that appeared when changing the PO Amount of the Purchase
 Order that is connected to a Project on the Purchase Order screen.

 [80245] Resolved an issue where no record was found when selecting the View Historical Yard Cost and View Previous Projects' Costs on the Quotation screen even when the conditions are met for either one of them to appear.

- □ [80406] Resolved an issue where list numbering in Project Job Descriptions were not appearing in sequence in the Project Specification Report.
- [80392] Resolved an issue with linked projects where sections of the projects were not arranged in the correct order on the **Compare Quotes** screen – **Summary** tab. (Items should be listed for the Main Project first, followed by the Linked Project.) This incorrect section order is also reflected in the generated Yard Bid Excel file.
