[Copy] [Save As...] [Send Error] [Details >>] [OK]

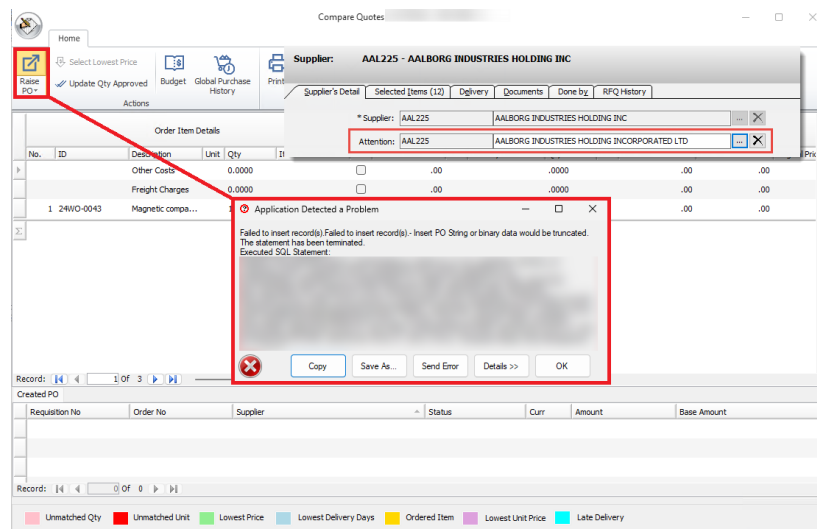

- ❑ [81465] Resolved an issue where if a Job Order was created from a Scheduled Job that had both a Primary and an Alternative due date, the system incorrectly displayed the Primary due date for the Job Order despite the Alternative due date being earlier.
- ❑ [80923] Resolved an issue where a Routine Task whose recurrence date had already ended failed to be deleted and still appeared in the Routine Task grid.

4. Procurement

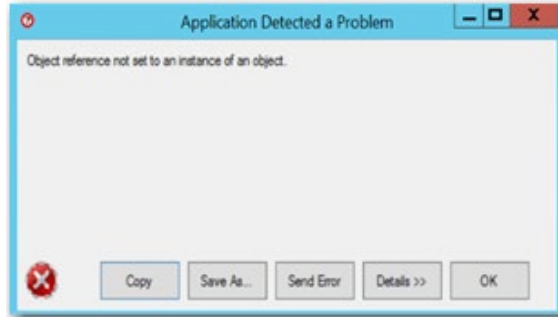

- ❑ [81713, 81701] Improved system performance when opening the **Supplier Quotation** screen for records with a large number of items and contracted items.
- ❑ [81709] Improved system performance when processing the **Quantity Approved is Changed** alert and cancelling requisition entries.
- ❑ [81708] Resolved an issue where the system was unable to send RFQ for bulk requisition via SupplierLink when the items in the requisition were deleted and added back again.

- ❑ [81706] Fixed an error that appeared when clicking the **Raise PO** button for a supplier quotation where the **Attention** field input exceeded 40 characters.

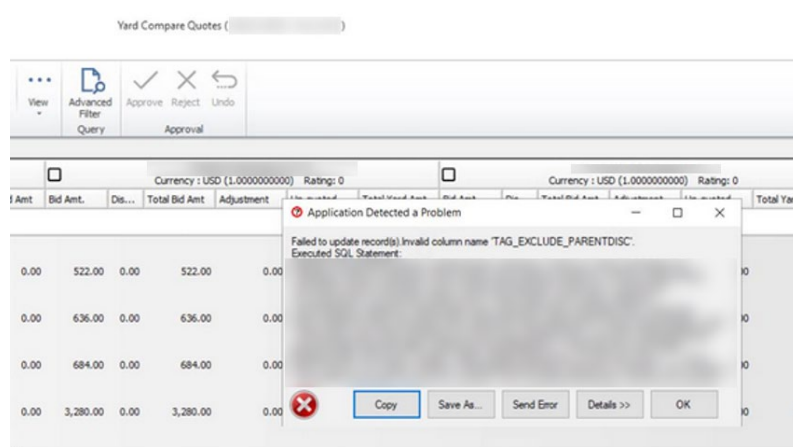

- ❑ [81712] Fixed an error that appeared on the **Requisition** screen when opening the Account lookup screen in a bulk requisition record that was created using an Excel Template with only free items.

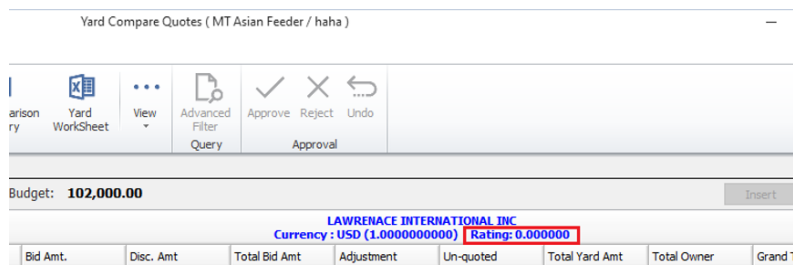

5. Projects

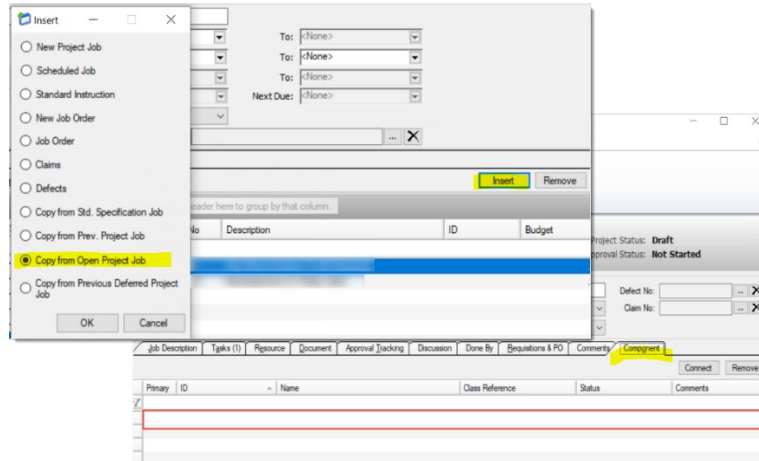

- ❑ [81308] Fixed an error that appeared when updating the **Adjustment** or **Unquoted** amount for unquoted Supplementary/Extra tasks on the **Yard Compare Quotes** screen – **Yard Details** tab (before updating it on the **Quotation** screen – **Selected Items** tab).

- ❑ [81250] Resolved an issue where the average **Rating** of the yard evaluation was not correctly displayed on the **Yard Compare Quotes** screen.

- ❑ [80972] Resolved an issue when copying a Project Job from another vessel (using the **Copy from Open Project Job** option) where the system incorrectly copied over linked components as well, causing the vessel component ID to be incorrect and the component was not displayed in the **Project Job** screen – **Component** tab.
