[81431] Resolved an issue where the system failed to apply the 'sort' sequence of licenses, causing a license with a lower sort sequence to supersede a license with a higher sort sequence.

Due to this issue, the compliance checking results showed the wrong status for crew licenses on the **Check Compliance** screen.

#### 4. Payroll

- [80986] Resolved an issue where the open amount for the accumulative account balance records was incorrectly carried forward from the preceding closed account period due to the following circumstances:
  - When the record does not exist, and a new record is to be inserted, the inserted records had an open amount of 0.

This occurred when the next account period was created after closing the current account period. After which, the records will be inserted when running crew payroll for the first time for the next account period.

When the record exists but is marked for recovery by the system (REC\_DELETED = -1), the existing record was recovered with the current month's accumulated amount as the open amount.

This issue only occurred when the activity's end status is 'Plan' and the accumulative amount should be paid off in the current account period (i.e. planned to sign off this month).

[81453] Resolved an issue where crew members' Passport No. was not displayed in the crew payslip.
