Product:	BASSnet™ Replicator
Release Number:	BR4.1 HF6-002
Release Date:	15 Oct 2024
Customer Support:	For more information or support, please visit our website http://www.bassnet.no/

This release addresses the following issues:

This release note describes the system-bug corrections (as reported by Customers) and new enhancements, if any, made in BASSnet Replicator 4.1 carried out in the Hotfix 6-002 patch released on 15 Oct 2024.

Recent Changes

❑ [82208] Resolved an issue where undelivered or delivery delayed emails were not deleted from the mailbox when using the Dart (OAuth2) email authentication service. This caused the replication process to take a longer time to complete as the emails accumulated in the mailbox.

This issue occurred when using email configurations (any combination with Dart) for the replication, such as:

- IMAP/POP3 + Dart
- IMAP/POP3 + Dart (OAuth2) for Outlook
- IMAP/POP3 + Dart (OAuth2) for Gmail

❑ [81395] Resolved an issue where replication files remained in the 'Send' folder even though they were sent successfully.
