

BASSnet 2.11 SP3 Hotfix 7-000 Patch Release Notes

Product Release Information

Product:	BASSnet™ 2.11 SP3
Release Number:	BN2.11 SP3 HF7-000
Release Date:	28 January 2025
Customer Support:	For more information or support, please visit our website
	http://www.bassnet.no/

This release addresses the following issues:

This release note describes the new enhancements and system corrections (as reported by Customers), if any, made in BASSnet 2.11 SP3 carried out in the Hotfix 7-000 patch released on 28th January 2025.

[CR 15658] The Report Job Done functionality has been updated so that the counter value input is always validated for 'Completed' Job Orders / Scheduled Jobs, regardless of whether the job is shifted to history.

Previously, when reporting a completed Job Order / Scheduled Job as 'Done' without shifting it to history, the system did not validate the counter value input, and no validation message was displayed when users entered invalid counter values.

- [CR 15660] Two new columns have been added to the Scheduled Jobs 'Find' screen for counter-based jobs:
 - Last Done Running Hours Value taken from Last Maintenance Running Hours under the History tab
 - □ **Running Hours Till Due** Value taken from the counter of the connected component using the calculation:

Next Due Value – [(Last Read Date Counter Average × Days Till Current Date) + Last Read Date Counter Value]

These new columns will be empty if the job is NOT a counter-based job.

□ [CR 15657] Users can now batch update the Job Description and First Due Date for connected *fleet-wide* Scheduled Jobs on the **Standard Instructions** screen.

To support this enhancement, an **Edit** button with a drop-down option has been added under the **Scheduled** tab, enabling users to select whether to update the **Job Description** or **First Due Date**.

2. Procurement

[CR 15310, 15311, 15858] A new system configuration QTYRECINMTRLUNIT has been added where, when enabled, the PO goods receipt process will be updated based on both Qty Received and Qty Received in Material Unit:

Admin: M	lanage Global Settings							
	⊞→					qtyrec	×	
K	ey: BASS9101			Module Code:	PROCUREMEN			
Descriptio				Parameter Code:	QTYRECINMTRLUNIT	•		
	BASSnet Procurement and BASSnet	Inventory App - PO.		Primary Value:	Y			
				Secondary Value:				
Descr. Abb	Dr.:			Setting Descr.:		ew set of logic is activated for PO goods at and BASSnet Inventory App - PO.	receipt in	
Key	Description	Module Code	Parameter Code	Primary Value	Secondary Value	Setting Description	Descr. Abb	ər.
BASS9101	When set to Y, the new set of logic is a	PROCUREMEN	QTYRECINMTRLUN	нт ү		When set to Y, the new set of logic is a	к	

When enabled, the following changes will be implemented:

- 3 new columns will be displayed in the **Purchase Order** record:
 - Qty Received in Mtrl Unit Quantity received in the unit of measurement set in the Material register. When Ordered/Received Unit is the same as the Material Unit, this column will display the Qty Received by default. When Ordered/Received Unit is <u>not</u> the same as the Material Unit, users are required to enter the Qty Received in Mtrl Unit.

(For example, when ordering 10 boxes containing 5 bottles of water each, the ordered/received Unit might be 'boxes' and the Qty Received is 10, but the Material Unit is 'bottles' and the Qty Received in Mtrl Unit is 50.)

- **Material Unit** By default, the system will display the unit as set in the Material register. This column is not editable.
- **Total Qty Received in Mtrl Unit** Displays the cumulative quantity received based on Qty Received in Mtrl Unit. This column is not editable.

The following changes have also been made (independent of the new configuration):

- A new validation has also been added to ensure that the Unit is entered for new free items that are added on Requisition/PO screens.
- In the SupplierLink Excel file, the **Unit** column will be mandatory for new free items entered in the Alternative Proposal section. It will not be editable for items received from RFQ.

No	Material ID	Description	Unit	Qty	Gross Unit Price	Discount(%)	Discount Amount
1	IMPA-472186	PLAIN PAPER FOR PRINTERS &COPIERS A4; 500SHT IN PKT	BOX	10.0000	0.0000	0.00	0.
		Alternative Proposal:					

[CR 15846] The PRINTPOAPPROVED system configuration has been enhanced to include a secondary logic. When the secondary value is set to 'Y', the system will validate the manual update of PO Status and/or Status Dates (e.g. Confirmed Date, Sent to Supplier Date, Received by Vessel Date, etc.) for POs with the following approval statuses: 'Not Started', 'Partially Approved' and 'Rejected'.

3. Operations

□ [CR 15621] The three 'overview' buttons in the **ODS Record Book** have been renamed to include the word '**Overview**', making the purpose of these buttons clearer to users.

	Comments:	

[CR 15900] All tank selection fields in the Oil Record Book now feature a lookup function, simplifying the selection process. This lookup includes all tanks (cargo, ballast, FO, etc.) registered in Vessel Particulars, regardless of the operation being recorded.

When a tank is selected, any available tank capacity fields on the input page will be automatically populated with the tank's capacity.

4. Document Manager

[CR 15909] The Updated Onboard and Vessel DocMerged columns under the Distribution screen – Versions tab now display N/A (Not Applicable) for URL-type documents distributed to vessels.

This new **N/A** status is introduced because onboard updates and the DocMerge process only apply to file-based documents and not URL-type documents.

- [CR 15899] The Vessel Version Overview tab on the Distribution screen is now enhanced with visual indicators to show the document sent status more clearly. The following updates have been made to support this enhancement:
 - Added a new Vessel DocMerged column that indicates the DocMerge status of the distributed document.

•

Renamed the Distribution Status column to Revision Status. This column indicates whether the document's latest version (revision) has been distributed.

[CR 15906] The Revision Distribution process in BASSnet 2.11 SP3 now automatically recreates missing patch files for documents revised using the Quick Revision feature in BASSnet Web 3.0.

When a missing patch is detected, the system will regenerate the patch by referring to its previous version's original file and update the patch path in the database.

Note: This CR supports the coexistence of the Document Manager module in the desktop system and the new web-based system, ensuring that both systems function seamlessly to handle critical document processes, maintain accurate results, and keep data and documents secure during the transition phase.

5. Projects

□ [CR 15760, 15761] Comments entered in Sections and Jobs in a Standard Specification will now be carried over into any Project created from the standard specification.

[CR 15791] On the Manage Projects – Quotation screen – Selected Items tab, the Disc Amt. column will now automatically update when the Qty or Unit Price is updated if Disc. % has value (if Disc. % is 0, the Disc. Amt will not be affected).

In addition, if the **Disc. Amt** is manually updated, the **Disc.** % will become 0. The system will calculate the Total Amount using the formula:

Total Amt = (Qty*Unit Price) – Disc. Amt.

- [CR 15748] On the Yard Compare Quotes screen Summary tab, the following columns and rows have been adjusted:
 - The **Overall Discount (%)** and **Overall Discount (Amount)** will now be calculated for the **Total Yard Amount** column instead of the **Grand Total** column.
 - The <u>sum</u> of the **Total Yard Amount** (after discount) and **Total Owner** columns will now be displayed on the **Total Project Costs** row.

[CR 15747] The Yard Comparison Summary report has been renamed to Yard Quote Comparison Summary. A new Yard Cost Comparison Summary report has been added on the Yard Compare Quotes screen. In addition, the View button has been renamed to Yard with a new icon.

[CR 15757] Saving the record on the Yard Compare Quotes screen – Yard Details tab and the Quotation screen – Selected Items tab will no longer collapse all the sections and jobs on the screen. The focus will remain on whatever task, job or section that was selected during the saving.

Fixes

1. Home & Administration

[82957] Resolved an issue where the status of Port State, Flag State, Vettings, and Undesired Events incorrectly remained as 'overdue' on the Fleet Compliance screen after users extended the record's due date, causing a mismatch with the Report Status.

[84126] Resolved a layout issue in the My Favorites widget where unnecessary spaces were added at the beginning of each item in the list when the screen was maximized (fullscreen mode), causing misalignment.

- [84049] Resolved the misleading lookup and column names in the Standard Instruction Change Log report:
 - Renamed the Job Description lookup to Description

Standard Instruction Change	Log			×	
Standard Instruct	atory.	•			
* Data Owner: AFF Job Description: Updated From:		Feeder 2		· · ·	
Reset	Standard Instruction C Standard Ins (he field(s) prefix with * is Prase complete all the ma	truction C			× Nort.
	* Data Owner: Description: Updated From:	AFFI <none></none>	MT Asian Feeder	r 2	X
	Reset			Generate Report	Done

- Renamed the lookup screen column names:
 - Job Code \rightarrow SI ID
 - Job Description ightarrow Description

🖳 Lookup - Standard Instructi	ion Description	– 🗆 🗙			
Drag a column header here to gro	oup by that column.	1			
Job Code	Job Description

INSP	🖳 Lookup - Standard Instruction Description	on	_		<
SPL					
SURVEY	Orag a column header here to group by that co				II.
CLEAN	SI ID	Description			4
Record: 1 of	Y				
	INSPECTION	WMA			
	DEFLECT CON	Deflection control			
	INSP	Inspection, control and cleaning			
	SPL	Oil sample			
	SURVEY	Inspection			
	CLEAN	Clean level glass			
	Record: 1 of 33				
		Select	ОК	Cancel	

4. Procurement

- [84327] Resolved an issue where changing the account code in the Purchase Order header section did not correctly generate estimate transactions for jobs/sections without account codes.
- [84313] Resolved an issue when creating a new Purchase Order where the Currency under the Finance Account tab did not update after changing the Supplier to another Supplier with the same name but different currency code.

🗒 Create New Purchase Order						
Vessel Order Info, Supplier Com	ponent Items Finance	Account Additional Info	Delivery Documents			
Supplier	🛒 Create New Purchase	e Order				
Please select a supplier.	Vessel Order Info.	Supplier Component I	tems Finance Account	Additional Info Deliv	ery Documents	
* Suppler:	* Ensore Accounts	COUNT count from the list, especially wh	en you are creating a direc	t purchase order.		
Delivery Terms:	USD:	0.00			•	
	* Currency: U		X			
	Total Amount:	0.00	JSD			
	Cost Unit:				X	

- □ [84325] Resolved an issue where reversal and accrual transactions were not generated correctly after:
 - changing the Other Cost and Freight Cost together with:
 - Supplier
 - Supplier Currency
 - Header Account (where some line items are without account)
 - Journal Entry Date
 - Delivery Date (when JED is null and PO not invoiced)
 - Required Date (when Delivery Date and JED are null)
 - Header Discount %
 - Sent to Supplier Date (when CRETRXXSENTTOSUPPLIER config is enabled).
 - changing the account code in a Purchase Order header when line items include account codes and Other/Freight Cost do not (but have value), together with:
 - Journal Entry Date
 - Delivery Date (when JED is null and PO not invoiced)
 - Required Date (when Delivery Date and JED are null)
 - Header Discount%
 - Sent to Supplier Date (when CRETRXXSENTTOSUPPLIER config is enabled).

5. Operations

□ [84284] Fixed the 'timeout' error when generating the **EU MRV** report.

② Application []	Detected a F	Problem		-		×
Execution Timeout s not responding.	t Expired. Th	ne timeout period e	elapsed prior to co	mpletion of the ope	ration or the	serve
8	Сору	Save As	Send Error	Details >>	ОК	

 [84285] Resolved an issue in the Copy Vessel Particulars function where the Component ID and Component Description of the tank types from the (source) vessel were not copied to the (destination) vessel.

6. SAFIR

[83799] Resolved an issue where users were able to create and connect job orders in all the Action tabs in SAFIR reports without proper access rights.

(i.e. Create Job Order button requires the Maintenance – Job Orders – INSERT access right, and Connect Job Order button requires the Maintenance – Job Orders – READ access right.)

□ [84166] Resolved an issue where inactive **Audit Types** were incorrectly removed from existing records after they were deactivated in the Code Structure register.

□ [83924] Resolved an issue where users were unable to edit the **Notes to Participants** after re-opening a closed Training & Drill record.

File Help	ve <

OMB SEARCH D	RILL			

7. Risk Management

[83716] Resolved an issue where the Set as Master Template button was incorrectly enabled for Risk Assessments created from Master Template on the vessel. This issue caused duplicate master templates to be created.

8. Document Manager

[84004] Resolved an issue where updating a document's revision number after revising the document at the Office site caused the new revision number to be replicated to the Vessel site, even when the Office user had not performed redistribution (the revised document itself was not replicated).

9. Projects

[83488] Resolved an issue where generating the Comparison Summary report for more than 5 yards caused the table in the report to overflow and users were not able to view all the content.

The Comparison Summary report will now be able to display up to 14 yards.
