Recent Changes

Fixes

1. Risk Management

- ☐ [85644] Resolved an issue where an error occurred when updating Permit to Work on the **Risk Assessment** screen. This was caused by the system incorrectly calculating the audit trail sequence number based on the entire Risk Assessment Form instead of the specific Work Permit being modified.

Additionally, resolved an issue where the system incorrectly generated duplicate audit trail entries for Work Permit when a new job order was created from a scheduled job that is linked to an existing Risk Assessment.
