Detailed Enhancements (CRs)

1. Home

- ❑ [CR 14291] The **Fleet – Alcohol Test** page now supports attachments so that documented proof / results of crew members' alcohol test can be uploaded.

2. Personnel

- ❑ [CR 14384] The **Onboard Training/Drills** tab on the **Profiles** and **License/Training** screens have been separated into two sub tabs to differentiate between onboard training and drills created in SAFIR and HRM/Seagull.

Additionally, the new configuration key '**CNPNSHOWORHIDEHRM**' has been added that hides the HRM's **Onboard Training/Drills** sub tab by default (Primary Value = '**N**') if users turn on the SAFIR license without Seagull integration.

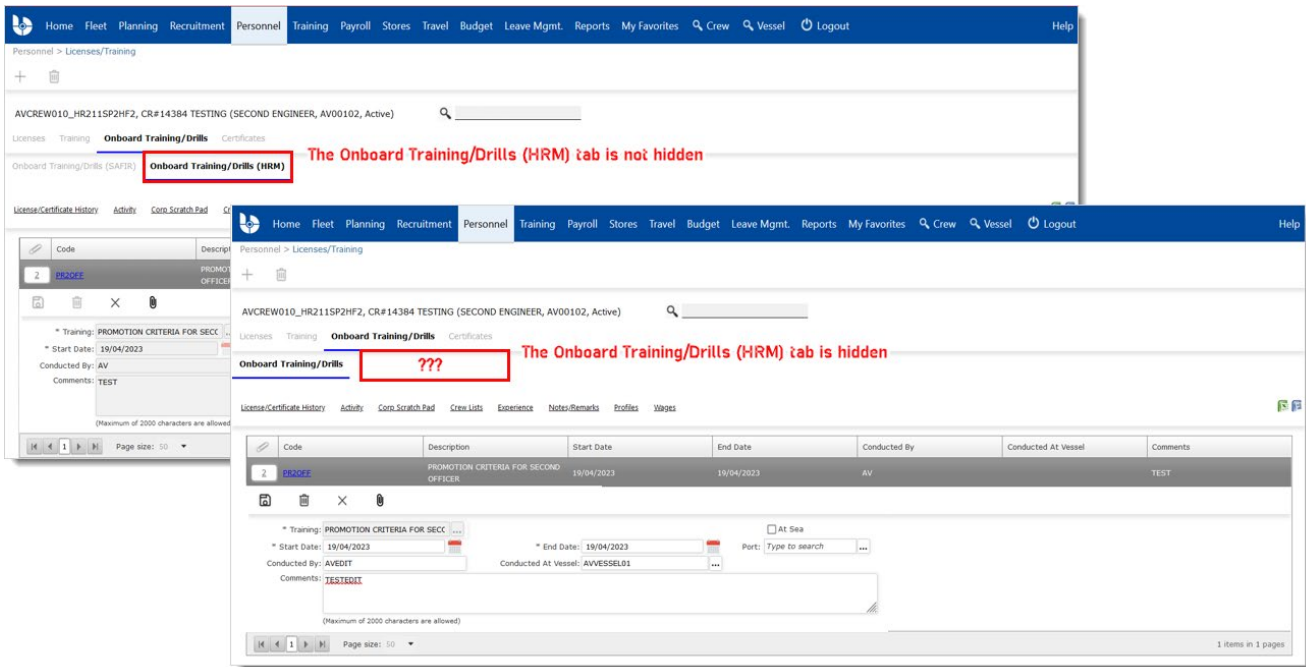

This change request is implemented because previously, records of training and drills in the form of computer-based trainings (CBTs) went missing if the CBTs were integrated via Seagull for BASSnet customers with the **SAFIR Training & Drills** module.

The sub tabs are:

Onboard Training/Drills (SAFIR)	<p>This sub tab is activated only if the User has been granted privilege / access right to access it and the SAFIR Training & Drills license has been activated.</p> <p>To show the Training & Drills records entered in the SAFIR module.</p>
--	--

<p>Onboard Training/Drills (HRM)</p>	<p>This sub tab is activated only if the User has been granted privilege / access right and configuration key 'CNPNSHOWORHIDEHRM' with Primary Value = 'Y' to access it.</p> <p>To show the Training & Drills records entered into the system, including the CBT records integrated via Seagull.</p>
---	--

When the **Onboard Training/Drills (HRM)** sub tab is hidden, the word SAFIR is excluded from the **Onboard Training/Drills (SAFIR)** sub tab because it is understood that the onboard training and drills is for the SAFIR module.

3. Training

- ❑ [CR 14200] The hardcoded training options **Mandatory** and **Additional** have now been changed to **Training Requirement Type** registers.

With this update, admin users can create additional registers under Training Requirement Type other than the two previously available hardcoded options.

Training Program: 2. LARGE CONTAINER VSL Vessel Type: 2. LARGE CONTAINER VSL

Rank:

Name	Description	Mandatory
Cargo Operations		
<input type="checkbox"/> CAR_LCHS	Liquid Cargo Handling Simulator	Mandatory
<input type="checkbox"/> CAR_BULK	Bulk Loading and Discharging Course	Mandatory
<input type="checkbox"/> CAR_CONT	Container Stowage Planning	Mandatory

Previously hardcoded options changed to registers.

4. Travel

- ❑ [CR 14028] When all the mandatory fields are predefined, new Travel Requests will now be created with the status 'Open' instead of 'Draft'. The mandatory fields are:
 - **Port register – Airport** information
 - **Profiles** screen – **Personal Info** tab – **Address** sub tab – **Airport** information
 - An **Activity** has been created with **Sign On/Off** port information.

In addition, a new icon is now displayed on the **Travel Request** screen – **Agents** tab to indicate that changes have been made to the travel details since the last time it was sent to the particular travel agent.

	INSTONE ATP Instone Marine & Corporate Travel	USD	16.02.2023	

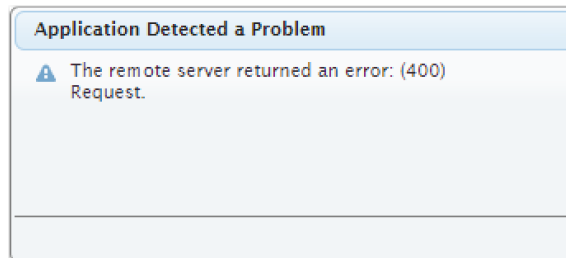

Fixes (Defects)

1. Personnel

- [Defect 77191] Fixed the long loading time that caused the application to time out when a vessel-site user updated the details of crew activity via the **Activity** screen, preventing the updates from being saved.

2. Travel

- [Defect 76951] Fixed an error that appeared when submitting travel request with special characters to ATPi CrewLink.
