Recent Changes

Enhancements

1. Operations

- ❑ [CR 15319] To ensure that entries are verified in a timely manner, the **Oil Record Book**, **Garbage Record Book**, and **Ozone Depleting Substances (ODS) Record Book** will now include alerts to let the designated verifiers know that there are entries pending verification.

The number of entries that have not been verified can be tracked via the **Record Verification Pending** alert in the **My Alerts** widget for each record book.

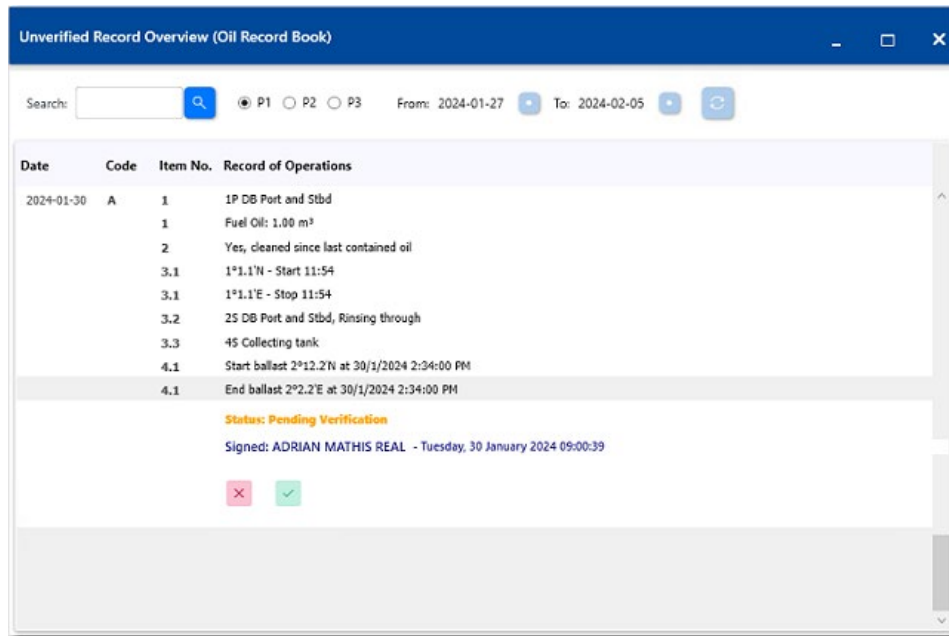

When any one of the three record book alerts are clicked, the list of entries pending verification for that specific record book will be displayed.

For example, clicking the **Record Verification Pending** alert for **Oil Record Book** will display all 98 records that are pending verification (active).

The verifier can double-click any of the unverified records from the list to open the specific entry in the **Unverified Record Overview** screen where they can verify the entry directly.

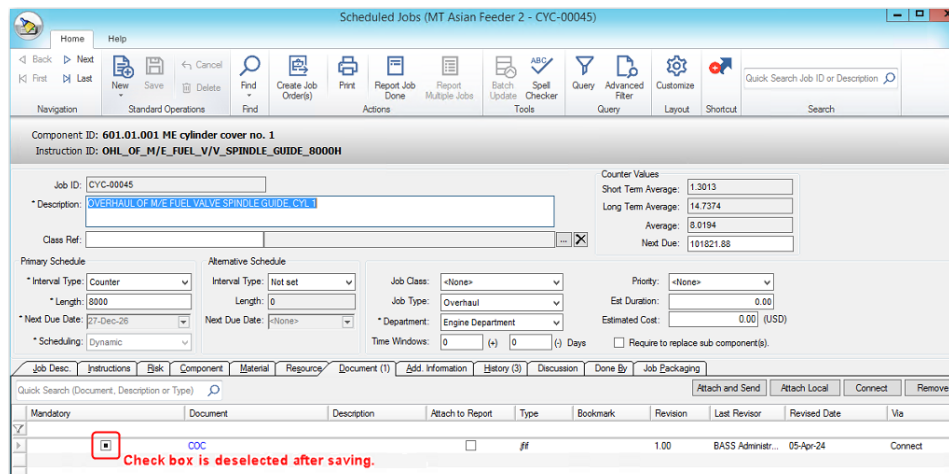

Fixes

1. Maintenance

- ❑ [81263] Resolved an issue where the '**Mandatory**' check box for a document attached / connected to a Scheduled Job was deselected unexpectedly when the Scheduled Job was saved despite setting the document as mandatory before saving.

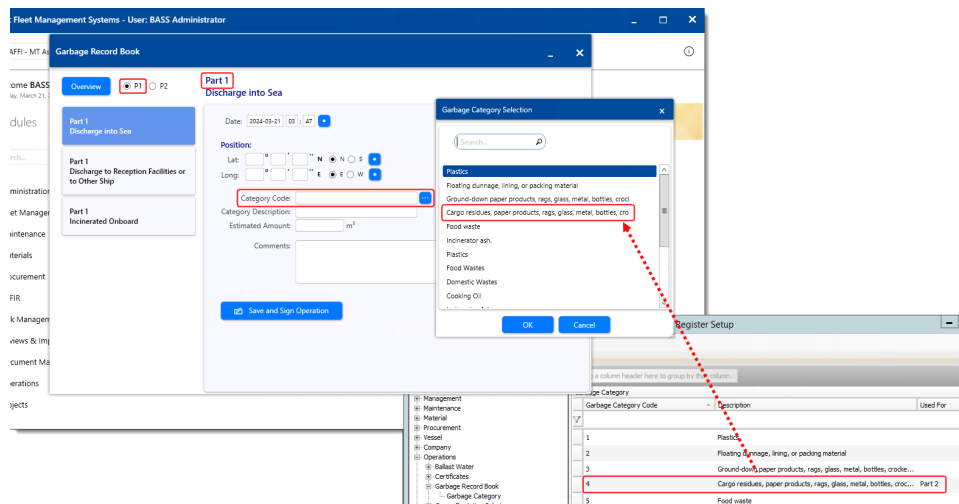

This issue also occurred when attaching / connecting documents to Standard Instructions and Job Orders.

- ❑ [81352] Resolved the following issues when using the **Shift Multiple Jobs to History** function:
 - The **Documents** tab and all connected documents were not displayed on the **Shift Multiple Jobs to History** screen.
 - Postponed Job Orders that were shifted to history did not show the 'Postponed' indicator  on the **Job History 'Find'** grid.

2. Operations

- ❑ [81079] Resolved an issue in the **Garbage Record Book** where the Garbage Category set as 'Used For Part 2' in the register was still showing in Part 1's category lookup.

- ❑ [81219] Resolved an issue on the **Overview** screen of the Oil, Garbage, and Ozone Depleting Substances (ODS) record books where the status of entries was not displayed.

All saved and signed entries in the record books will now display any one of the following three colour-coded statuses at any given time for easier tracking of entries by status:

Status	Description
Status: Pending Verification	When an entry has been saved and signed by a crew member and is waiting to be verified, the status is indicated in YELLOW .
Status: Verified	Upon verification, the verifier's name, date, and time verified will be displayed, and the status is indicated in GREEN .
Status: Deleted	If an entry that has been saved must be amended, the crew member that recorded the data can delete and re-enter the correct data. Deleted entries are indicated in RED .

- [81223] Resolved an issue where users were unable to upload attachments in the Oil, Garbage, and ODS record books.

The **Attach Documents** button is now available on every entry screen of the record books, enabling users to upload attachments to specific entries via three methods.

Garbage Record Book

Overview P1 P2

Done

Method	Explanation
	This method enables users to attach a document from their local computer, which will then be replicated over to the main office during the replication process.
	This method enables users to attach a document from their local computer, which will not be replicated.
	This method will launch the Document Manager where users can browse through the folder structure and locate the document they want to connect to an entry in the Oil Record Book.

Saved and signed entries with attachments will show the 'Attachment'  icon on the **Overview** screen.
