2. Procurement

[83714] Resolved an issue where the currency rate of a newly added material in Purchase Orders does not match the transaction currency rate. This only occurred after all the materials in the Purchase Order were previously deleted, and the supplier currency rate was not inversely proportional to the transaction currency rate.

3. Document Manager

[82034] Resolved an issue where updating a document's revision number after revising the document at the Office site caused the new revision number to be replicated to the Vessel site, even when the Office user had not performed redistribution (the revised document itself was not replicated).

4. Projects

 [83486] Resolved an issue on the Yard Compare Quotes screen where the Total Yard Amount was not automatically updated after making changes to the other amounts. Now, the Total Yard Amount will immediately update in real-time without requiring the user to save first.
