2. Support for Single-Sign On (AAD) Login.....	2
3. External User Validation .....	3
4. Compress Report Attachments.....	4
5. Enhancements to Rating/Category Mode .....	5

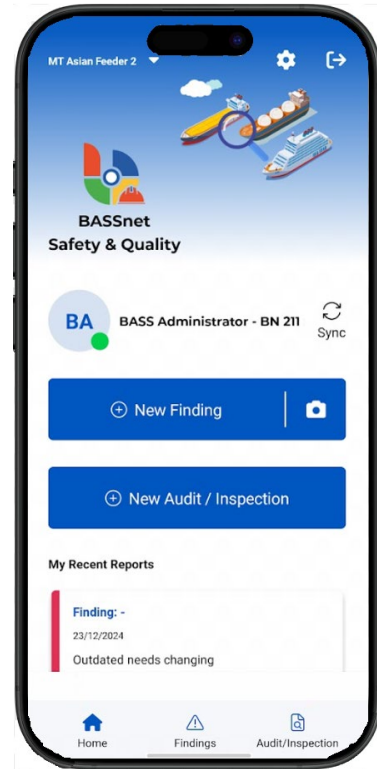

## Recent Changes

### New Features & Enhancements

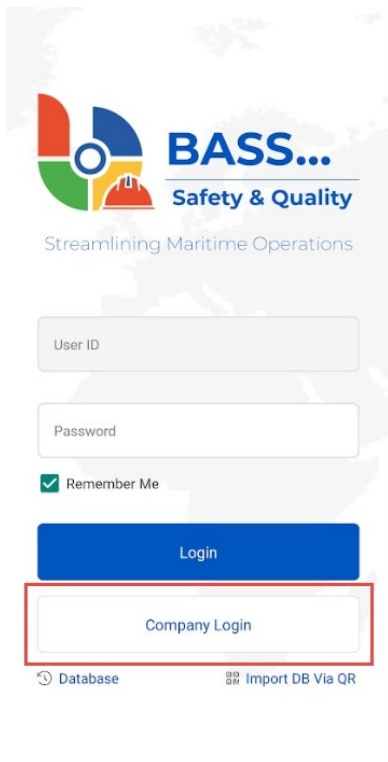

#### 1. Safety & Quality App 2.11 SP3 Now Available on iOS

The latest version of the BASSnet Safety & Quality App is now also available on iOS and can be downloaded directly from the [Apple App Store](#).

You can also scan the QR code below to access the App Store:

**Note:** The iOS version is compatible with BN2.11 SP3 HF6-000 and later versions.

#### 2. Support for Single-Sign On (AAD) Login

[CR 15810] The BASSnet Safety and Quality App now supports Single-Sign On (SSO) via Azure Active Directory (AAD). The addition of SSO will provide a more secure and efficient authentication experience.

To enable this feature, the system configuration 'SINGLE\_SIGN\_ON\_WEB' must be enabled in BASSnet to display the Company Login button on the Login screen.

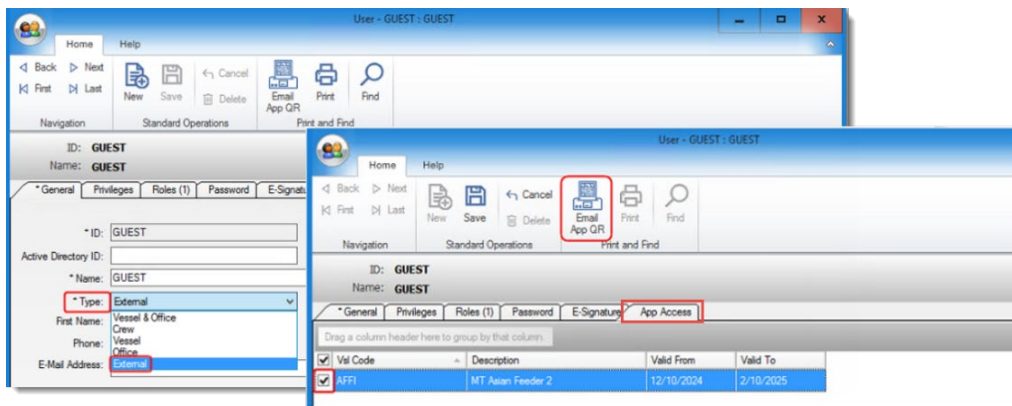

### 3. External User Access & Validation

[CR 15796, 15798] A new External User category has been introduced in BASSnet 2.11 SP3 HF3 to enable third-party users to log in to BASSnet and BASSnet mobile apps with limited access.

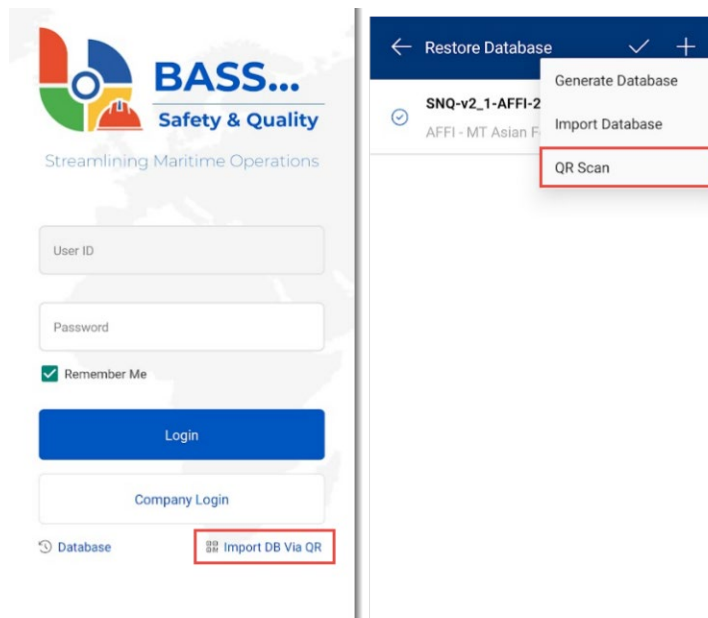

The following features will be disabled/hidden in the Safety & Quality App for external users:

- Event Reports will be disabled
- Checklist Item - Corrective Action, Resource and Issued Date fields will be hidden.

When a user is set as 'External', administrators can set a specific date range (under the **App Access** tab on the **Manage Users** screen) for the third-party user to access the app (for example, to carry out relevant audits/inspections). When logging in, the system will check that the login date is within the external user's validity period.

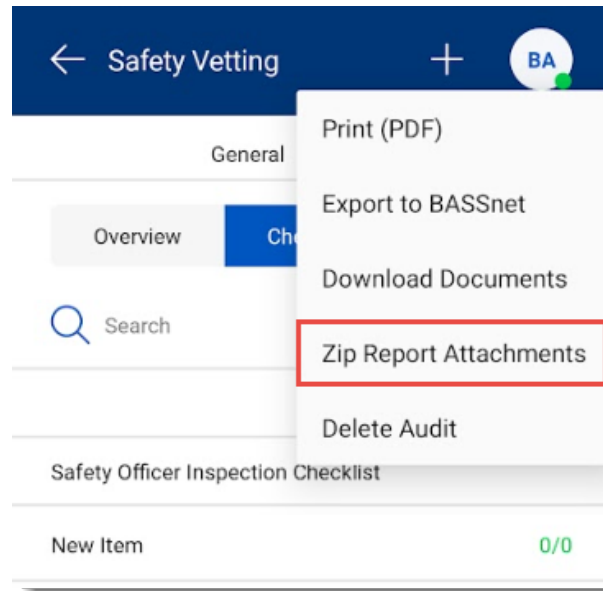

Administrators can click the **Email App QR** button to send a QR code which allows the external user to generate a database of the assigned vessel with limited data. As a result, a new **QR Scan** option is now available on the **Restore Database** screen in the app, allowing external users to scan the QR code provided.

#### 4. Compress Report Attachments

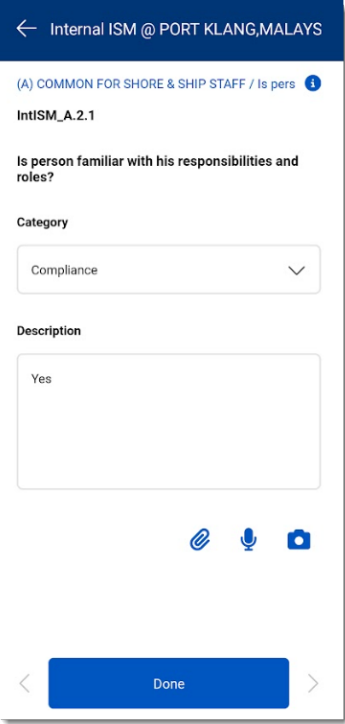

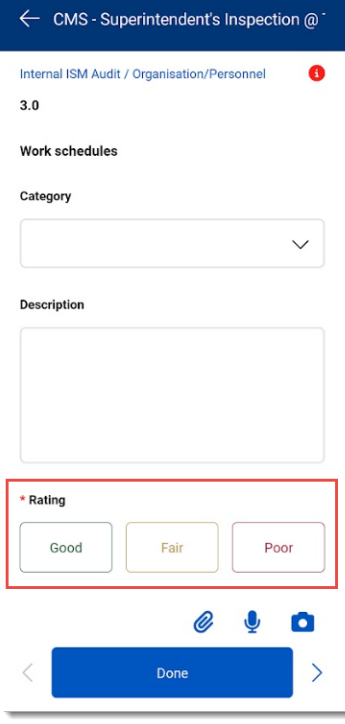

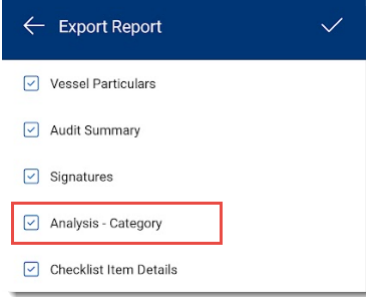

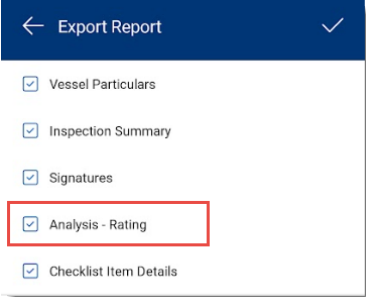

[CR 14599, 15800] A new **Zip Report Attachments** option is now available by tapping on the user avatar in an audit/inspection record. Selecting this option will compress all attachments (including the cover photo) to a .zip file and save it to the device or to cloud storage.

The report name will be used as the name of the compressed folder, and the folder structure will appear as follows: Group Name > Section Name > Attachments with Checklist Item Code – 1, Checklist Item Code - 2 , Checklist Item Code – 3, etc.

## 5. Enhancements to Rating/Category Mode

[CR 15398] The following changes have been made to optimize and differentiate the Rating and Category modes for audit/inspection reports:

	Category Mode	Rating mode
<b>Checklist Items</b>	No Rating buttons displayed  	Rating buttons (Good, Fair, Poor) will be displayed  
<b>Print PDF – Export options</b>	‘Analysis – Category’ will be available for selection  	‘Analysis – Rating’ will be available for selection  
<b>Section Scoring</b>	Award scores based on compliance (to Compliant items only)	Award scores based on ratings (to Good and Fair ratings only)

**Note:** The Rating/Category modes are set in the INSAPP\_AUDITRATING and INSAPP\_SHOW\_RATING configurations in BASSnet.
