Table of Contents

Fixes

❑ **Report Fix: Accurate and Relevant Request for Quotation (RFQ) Sent data**

[84055] Enhanced the accuracy of the **Procurement Efficiency KPI** report to ensure only accurate and relevant data is displayed.

Previously, the **RFQ Sent in 1 Day(s)** chart showed equal *Within Threshold* and *Beyond Threshold* percentages for data items in each category (User, Role, Vessel, Vessel Group, Office, and Pool).

With this update, the *Within Threshold* and *Beyond Threshold* percentages are now correctly calculated based on the number of Purchase Orders the category is involved in.

The screenshot below shows the RFQ Sent in 1 Day(s) chart for the User category before and after the update.

Additionally, for the User category, the chart now only displays data for users actively involved in the RFQ process. Previously, it included all vessel crew and office staff, even if they were not part of the RFQ process.
