Product:	BASSnet™ Web Portal 1.4 (BN2.11 HF5-000 Compliant)
Release Number:	WP1.4 HF3-150
Release Date:	4 April 2025
Customer Support:	For more information or support, please visit our website http://www.bassnet.no/

This release addresses the following issues:

This release note describes the system corrections (as reported by Customers) and new enhancements, if any, made in BASSnet Web Portal 1.4 carried out in the Hotfix 3-150 patch released on 4th April 2025.

Recent Changes

- ❑ [CR 16010] The Web Portal now supports multi-domain login using Single Sign-On (SSO), allowing users to alternate between different domain accounts within the same organization.

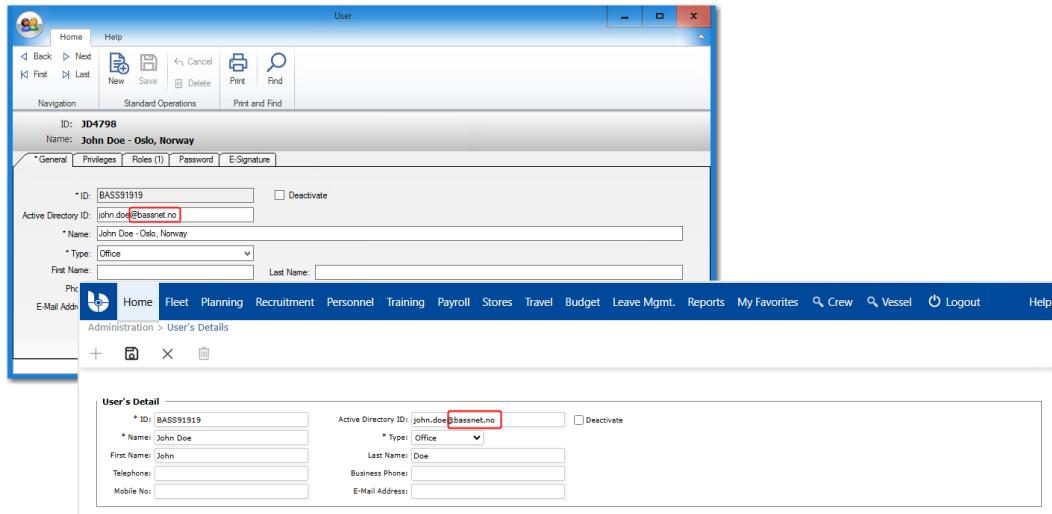

For customers using SSO via Azure Active Directory (AAD), please ensure that the Active Directory ID is entered in the format **user@domain.com** to ensure successful authentication.

For example, a user John Doe who has accounts in Norway and Malaysia with two domains must log in with his Active Directory IDs (john.doe@**bassnet.no** and john.doe@**bassnet.my**), instead of just "john.doe".

However, assuming there are two users named John Doe with two different domains (one in Norway and one in Malaysia), then they will be differentiated by their User ID:

- John Doe 1:
User ID: **BASS91919**
Active Directory ID: john.doe@**bassnet.no**
- John Doe 2:
User ID: **BASS92920**
Active Directory ID: john.doe@**bassnet.my**

In any case, one user can only have one Active Directory ID (if they have two or more accounts, then their domains in the Active Directory ID cannot be the same). When registering a new user in BASSnet or HR Manager, make sure the domain is included in the **Active Directory ID** field.

The screenshot displays the BASSnet User Management interface. The top window shows the user's profile for John Doe (ID: JD4798) with fields for ID, Name, Active Directory ID, Type, and First/Last Name. The Active Directory ID field is highlighted with a red box. Below this, a second window titled 'Administration > User's Details' shows a more detailed view of the user's information, including fields for ID, Name, Active Directory ID, Type, First Name, Last Name, Telephone, Mobile No, Business Phone, and E-Mail Address. The Active Directory ID field in this window is also highlighted with a red box.

Note: This update includes configuration changes that are required for the Web Portal to function properly. If these changes are not applied, users may experience issues when accessing the Portal. A step-by-step guide will be provided to assist with the configuration process. For further clarification or assistance, please contact BASS Support.
