New Features & Enhancements	2
1. New User Login for Legacy Database	2
2. Control Visibility of Unused Features	3
3. Update License File for Expired Licenses.....	5

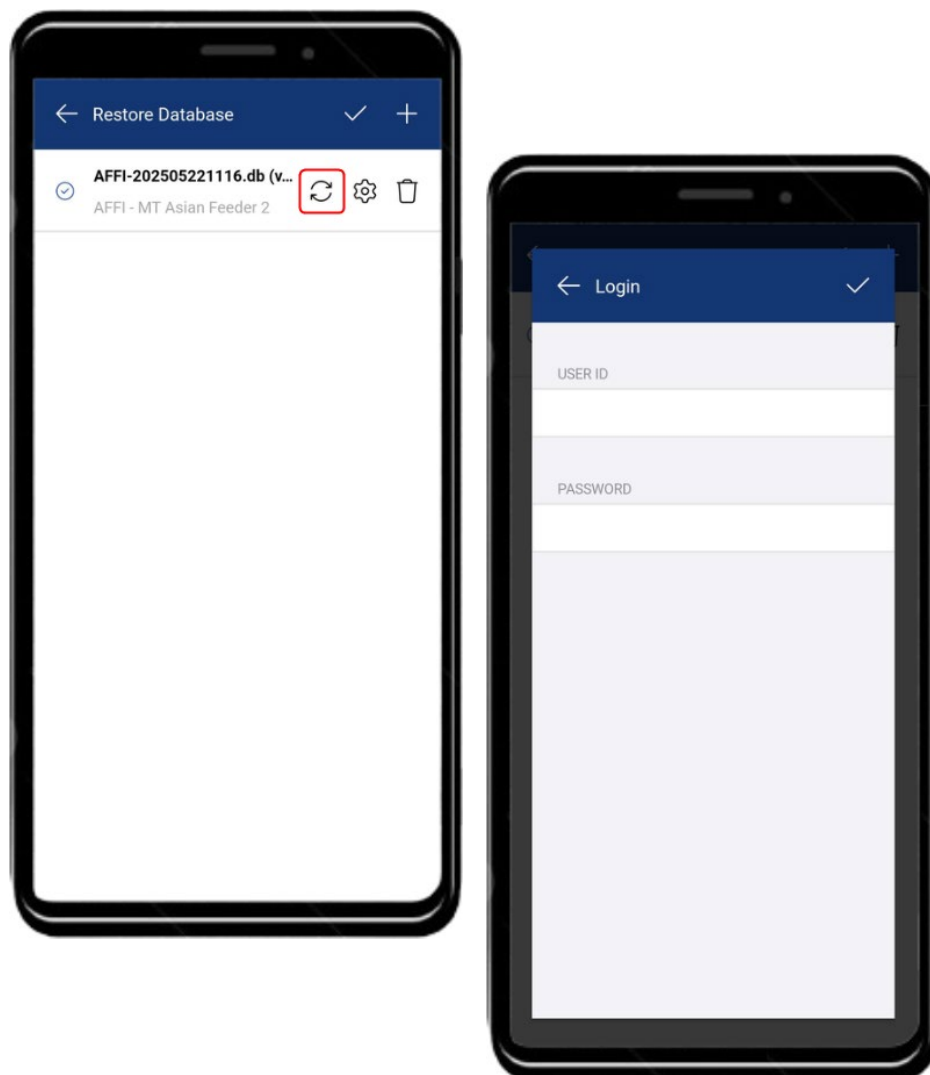

Recent Changes

New Features & Enhancements

1. New User Login for Legacy Database

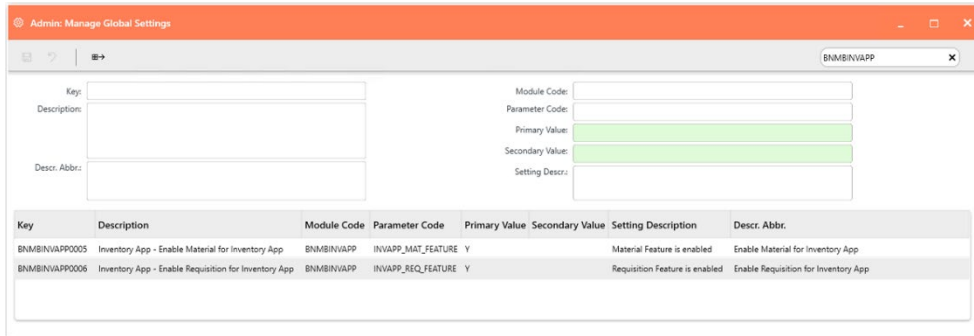

[CR 16111, 16112] On the **Restore Database** screen, the **Synchronize** icon  has been added next to the **Settings** icon. Tapping on the icon will open a login screen to allow new users to log in to a database that was generated before their user account was created.

Upon logging in, the system will perform synchronization, and the credentials will be verified against the BASSnet database via the BASSnet Authentication Service.

2. Control Visibility of Unused Features

[CR 16047, 16048, 16049, 16050] Two new configuration keys are now available in BASSnet Global Settings to enable/disable the **Material** and **Requisition** features in the app. The default value of the keys is 'Y' (enabled). To disable the features, set the Primary Value to 'N'.

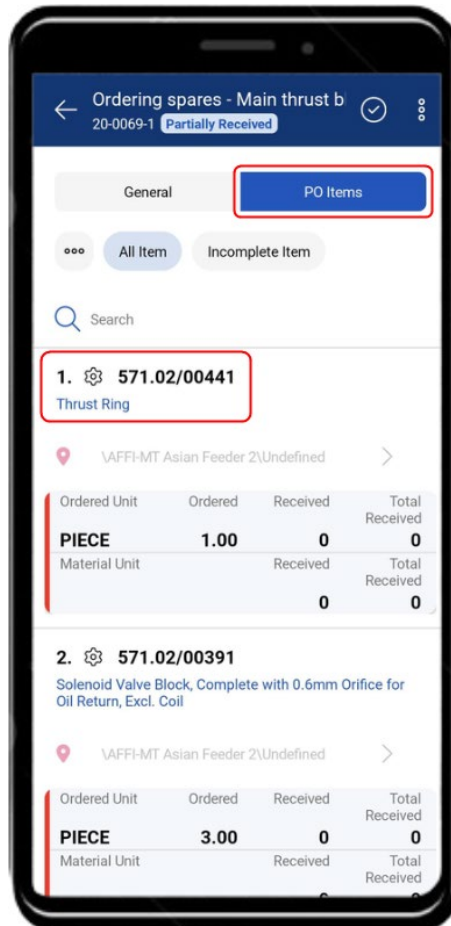

Key	Description	Module Code	Parameter Code	Primary Value	Secondary Value	Setting Description	Descr. Abbr.
BNMBIN/VAPP005	Inventory App - Enable Material for Inventory App	BNMBIN/VAPP	INVAPP_MAT_FEATURE	Y		Material Feature is enabled	Enable Material for Inventory App
BNMBIN/VAPP006	Inventory App - Enable Requisition for Inventory App	BNMBIN/VAPP	INVAPP_REQ_FEATURE	Y		Requisition Feature is enabled	Enable Requisition for Inventory App

Note: Disabling the **Material** feature will result in the following:

- The Quantity of materials will be visible but not editable when accessed from the **Purchase Order – PO Items – Material Details** screen.
- Performing bulk actions (**Export, Generate QR, Move, and Add to Working List**) for **Requisition** items will be disabled; only the **Remove** action will remain enabled.

3. Update License File for Expired Licenses

[CR 16115, 16118] The **Replicate License** option has been added to the **License expired** pop-up screen, allowing users to renew their license by replicating the license from the BASSnet database to the local database in the mobile device. Users will need to log in to the authentication server for verification to validate the license file.

Note: The credentials will be verified against the BASSnet database, not the local app database.
